cost of power sold to the Severn System during the years 1917, 1918 and 1919, resulting in an additional credit to the municipalities for each of those years respectively.

- (c) On December 20, 1922 the Commission decided that the depreciation rate should be reduced from 2% to 1.5% "and that this rate be made retroactive to date of first operation."

The figures appearing in the "Actual Rate" columns of the summary represent the cost per H. P. after giving effect to the adjustments referred to in paragraphs (a) and (b) above.

The Commission has not as yet prepared schedules showing a revised cost of power after giving effect to the reduction in the renewal rate decided upon in 1922, referred to in paragraph (c) above. We have not, therefore, considered this adjustment in preparing the attached summary.

Yours very truly,

Price Waterhouse & Co.
